Skills

Ruby, Ruby on Rails, Python, Django, Javascript, CSS, HTML5, Git, SQL, PostgreSQL, AJAX, JQuery, Ember.js, Test Driven Development

---

Experience

Antenna.is / Web Development Intern
January 2016 - PRESENT, Portland, OR

I work with the web development team on a content engagement application. My current project is creating and implementing an automated publisher sign up and domain ownership verification system in Python and Django.

HackPDX Winter Hackathon/ First Place
December 2015, Portland, OR

I was part of a 4 person team that conceived, designed, built, and deployed a web app in under 10 hours, and won a local hackathon. The completed app was a web dashboard for teachers to manage student records and provide daily updates to parents on student progress. It was built with Ruby on Rails, PostgreSQL, MailGun, and wire-framed with Twitter Bootstrap.

Epicodus / Web Development
August 2015 - December 2015, Portland, OR

At Epicodus I was immersed daily in coding projects that taught me the skills I needed to become a web developer. Over the course of the program I built web applications from the ground up using: HTML, CSS, Javascript, jQuery, Ruby, PostgreSQL, ActiveRecord, Ruby on Rails, APIs, AJAX, and Ember.js.

Hormel, Ford, Nintendo / Tour Manager
April 2013 - August, 2015, Nationwide

I worked as an independent contractor producing and managing marketing events for major brands such as Hormel, Ford, Nintendo and HEB. My responsibilities as a tour manager included driving branded commercial vehicles, setting up and running events, meeting client goals, and managing local staff.

Education

University of Florida / Microbiology
August 2005 - December 2009, Gainesville, FL
